UNDERSTAND THE CONCEPTS…

Before starting exercises, explain - *in your own words* – the benefit of some concepts in JS

What is the benefit of	You explanation
Benefit of function **default argument**	To set default values for parameters if no value or undefined is passed.
Benefit of **arrow functions**	To write shorter functions and avoid these binding issues.
Benefit of the **destructuring syntax**	It makes extracting values from arrays or objects easier, shorter, and more readable.
Benefit of the spread operator	It's used to clone from the original arr.
